

Follow-Up Home Antigen Testing for Michigan Medicine Employees

Exposed Employees

Michigan Medicine employees who are unvaccinated, asymptomatic and required to quarantine due to a recent exposure should follow this process:

Day 0: date of exposure

Days 1-6: quarantine period

Day 7: perform follow-up home antigen test

If an exposed employee develops Covid-19 symptoms during their quarantine, they should refer to the **Covid-19 Symptomatic Testing** section on the OHS website (www.mhealthy.umich.edu/ohs) to obtain a Covid-19 test.

If an exposed employee tests positive for Covid-19 during their quarantine, they should report the positive test in Wolverine Access or by using [this survey](#).

Covid Positive Employees

Michigan Medicine employees who are required to isolate following a positive Covid-19 test should follow this process:

Day 0: symptom onset or date test performed

Days 1-4: isolation period

Day 5: perform home antigen test

Employees feeling well enough should return to work the day after receiving a **negative** follow-up home antigen test if the employee is fever-free without the use of fever reducing medications in the past 24 hours with improved symptoms.

If an employee is unable to return to work by day 11 due to persisting symptoms, contact Occupational Health Services at (734) 764-8021, prompt 1.

Obtaining a Home Antigen Test Kit

- ◊ Michigan Medicine employees with access to a home antigen test kit can use it.
- ◊ Michigan Medicine employee who are in quarantine or isolation and do not have a home antigen test kit should plan to pick one up from:

2705 S. Industrial Hwy
Ann Arbor, MI 48104

Monday, Tuesday, Thursday, or Friday
8 am – 4 pm

To pick up a test kit, Michigan Medicine employee should follow the signage to the home test kit pickup area located at the back (east side) of the building. **Employees should remain in their car and wear a mask.** Signage on the building will designate the pickup parking spaces and provide further instruction.

Employees should call (734) 803-0530 upon arrival to provide name, UMID number and parking space number. Employees will then present their UMID badge and a test kit will be passed through the partially opened car window.

Reporting Follow-up Home Antigen Test Result

Michigan Medicine employees should report their **follow-up** Home Antigen Covid-19 Test Result using [this survey](#). Further instructions and return to work status will be provided at the end of the survey. Employees should download a copy of the survey responses and share the return to work instructions with their supervisor.

OHS will not provide additional documentation or follow-up at completion of the home antigen survey.
