Arm’s Length: No-No

In Close: ERGO
ERGOnomics makes it easy to be more comfortable at work.

ERGO Made Easy Tip:

Did you know that keeping work items closer is better for your body? It’s especially true when you’re lifting heavy items — and even when using your computer mouse. In fact, placing your mouse so it’s within arm’s reach can help prevent back pain caused by over-reaching. Give it a try:

1. Place postcard next to keyboard.
2. Use it as a mouse pad.
3. Enjoy.
