In the context of sustained community transmission of COVID-19, all workforce members are at risk for unrecognized exposures. Therefore, all workforce members should self-monitor for symptoms daily prior to reporting to work using the ResponsiBLUE screening check: https://responsiblue.umich.edu/.

What are the symptoms of COVID-19?

The most common symptoms of COVID-19 include fever, cough, shortness of breath, fatigue, muscle aches, headache, loss of sense of taste or smell, sore throat, upper respiratory symptoms (runny nose, nasal congestion, sore throat), nausea or vomiting, and diarrhea. Symptoms may occur 2-14 days following exposure.

These symptoms are not specific to COVID-19 and can occur with other viral respiratory infections (e.g., influenza) and illnesses.

What should I do if I become ill?

Michigan Medicine, U-M Ann Arbor, U-M Dearborn and U-M Flint employees and U-M health professions students in the medical, dental, nursing and pharmacy schools may now use the MyUofMHealth patient portal to assess their eligibility for a U-M employee COVID-19 test. If they are eligible, most employees and health professions students will be able to schedule their COVID-19 test through MyUofMHealth immediately after completing the assessment without needing to contact Occupational Health Services (OHS).

The MyUofMHealth patient portal is the preferred option for symptomatic U-M workforce members to access COVID-19 testing. Workforce members who are unable to access the portal may call OHS to report symptoms and arrange for testing if appropriate. The symptom reporting survey on the OHS website is no longer available.

Asymptomatic workforce members wanting COVID-19 testing should utilize the U-M Community Sampling and Tracking Program (CSTP), a community testing resource, or a home antigen test.

Please refer to the tip sheet on the OHS website for information on accessing the MUofMHealth portal and using the COVID-19 testing assessment.

What should I do if I am diagnosed with COVID-19?

If you are diagnosed with COVID-19, you should stay at home unless you require medical attention.

9/27/22
Depending on whether you are a Michigan Medicine or campus employee, contact tracing for your workplace may be performed by Infection Prevention and Epidemiology (IPE) or Environmental Health and Safety (EHS). You should follow any instructions you are given to ensure that contact tracing can be completed. You should also notify your own close contacts.

Based on guidance from the Centers for Disease Control and Prevention (CDC), employees diagnosed with COVID-19 should adhere to the following guidelines:

<table>
<thead>
<tr>
<th>Michigan Medicine workforce members with a positive COVID-19 test</th>
<th>Employees with mild to moderate illness who are not moderately or severely immunocompromised may not report to work until:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• At least 5 days have passed since symptoms first appeared and</td>
</tr>
<tr>
<td></td>
<td>• At least 24 hours have passed since last fever without the use of fever-reducing medications and</td>
</tr>
<tr>
<td></td>
<td>• Symptoms have improved (e.g., cough, shortness of breath)</td>
</tr>
<tr>
<td></td>
<td>• A negative COVID-19 home antigen test is required to return to work after day 5. Employees with a positive home antigen test on day 5 should retest on day 7, and if the test is negative may return to work on day 8. Employees with a positive test on day 7 should remain off work for 10 days. Employees who test positive for COVID-19 receive instructions on home antigen testing from OHS.</td>
</tr>
</tbody>
</table>

Employees with severe to critical illness or who are moderately or severely immunocompromised may not report to work until:

- At least 10 days have passed since symptoms first appeared
- At least 24 hours have passed since last fever without the use of fever-reducing medications
- Symptoms have improved (e.g., cough, shortness of breath)
- Two negative home antigen tests are required to return to work after day 10. Employees should take a home antigen test on day 10 and day 11 (tests should be administered at least 24 hours apart). If both results are negative, the employee may return to work on day 12. Employees with a positive antigen test on day 10 or 11 should contact OHS for guidance.

Employees who are not moderately or severely immunocompromised and were asymptomatic throughout their infection may return to work when at least 5 days have passed since the date of their first positive viral diagnostic test, as long as they have a negative COVID-19 antigen test on day 5.

Employees with a positive home antigen test on day 5 should retest on day 7, and if the test is negative may return to work on day 8. Employees with a positive test on day 7 should remain off work for 10 days. Employees who test positive for COVID-19 receive instructions on home antigen testing from OHS.
**Campus workforce members with a positive COVID-19 test**

- Isolate for at least 5 days from symptom onset date.
- If asymptomatic or symptoms are noticeably better, can end isolation on day 6.
- Wear a well-fitting mask (medical mask, KN95, or N95) on days 6-10 following the isolation period.
- Continue to isolate for a full 10 days if symptoms are not improving.
- A negative test for COVID-19 is not required to return to work.
- EHS may provide additional guidance to employees who have severe or critical illness or are moderately or severely immunocompromised.
- Check the U-M Health Response website for updated guidance.

**Why are isolation guidelines different for Michigan Medicine workforce members and campus workforce members?**

In order to enhance protection for healthcare personnel (HCP), patients, and visitors, the CDC has different guidance for HCP compared with the general public.

**COVID-19 Exposures**

**How can I protect myself from exposure to COVID-19 at work?**

All employees should get vaccinated against COVID-19.

Michigan Medicine employees should follow recommendations from IPE for appropriate use of personal protective equipment (PPE), including masking, and practice hand hygiene regularly. Updated recommendations can be found at:

[http://www.med.umich.edu/i/ice/resources/coronavirus.html](http://www.med.umich.edu/i/ice/resources/coronavirus.html)

U-M campus workforce members should follow guidance from EHS, which is available at:

[https://ehs.umich.edu/2020/03/24/ehs-covid-19-information/](https://ehs.umich.edu/2020/03/24/ehs-covid-19-information/)

**How are high-risk exposures to COVID-19 defined?**

High-risk exposures are defined based on CDC guidance. Please reference the chart and the links below for more information. All other types of exposures are considered to be low-risk, and no further action is required other than symptom monitoring.

[https://www.cdc.gov/coronavirus/2019-ncov/your-health/if-you-were-exposed.html](https://www.cdc.gov/coronavirus/2019-ncov/your-health/if-you-were-exposed.html)
**Michigan Medicine HCP with workplace exposures to patients, visitors, or other HCP with confirmed COVID-19**

High-risk exposure is defined as prolonged (cumulative total of >15 minutes over a 24-hour period) close contact (within 6 feet) while not wearing appropriate personal protective equipment (PPE):

- Not wearing a mask
- Not wearing eye protection if the person with COVID-19 was not wearing any type of mask
- Not wearing eye protection and a respirator while performing an aerosol-generating procedure on a patient with COVID-19 for any duration of time

Timing of close contact with confirmed case of COVID-19:

- Within 2 days prior to symptom onset until 5 days after symptom onset (for exposure to patient with COVID-19: until patient meets criteria for discontinuation of Special Pathogens Precautions)
- If no symptoms, within 2 days prior to date of positive test until 5 days after

**All other exposures to individuals with confirmed COVID-19**

High-risk exposure is defined as prolonged (cumulative total of >15 minutes over a 24-hour period) close contact (within 6 feet).

Timing of close contact with confirmed case of COVID-19:

- Within 2 days prior to symptom onset until 5 days after symptom onset
- If no symptoms, within 2 days prior to date of positive test until 5 days after

---

**What should I do if I had a high-risk exposure to a confirmed case of COVID-19?**

<td>You do not need to report your exposure to OHS unless you develop symptoms.</td>
<td>You do not need to report your exposure to OHS unless you develop symptoms.</td>
</tr>
<tr>
<td>You do not need to quarantine following an exposure, regardless of vaccination status.</td>
<td>Employees should follow updated guidance available at: <a href="https://healthresponse.umich.edu/">https://healthresponse.umich.edu/</a></td>
</tr>
<tr>
<td>You should monitor for symptoms and get tested on days 1, 3, and 5 following the exposure. You can test using CSTP, a community testing resource, or a home antigen test. Testing with a home antigen test is preferred if you were diagnosed with COVID-19 in the past 90 days.</td>
<td></td>
</tr>
</tbody>
</table>
What are the criteria for COVID-19 testing for U-M workforce members through OHS?

OHS offers COVID-19 testing for all U-M employees, student employees and health professions students. The criteria for being tested at OHS are as follows:

- If you have any one of the following:
  - Fever (temperature greater than 100.4°F or 38°C)
  - New cough
  - New shortness of breath or hypoxia

- Or if you have any two of the following:
  - Chills
  - New muscle aches
  - New headache
  - New runny nose or nasal congestion
  - New sore throat
  - New loss of sense of smell or taste
  - New nausea, vomiting or diarrhea
  - New rash

Symptomatic Michigan Medicine employees with upcoming clinical work are eligible for rapid testing.

OHS is not currently able to provide on-demand testing for asymptomatic workforce members, including before or after personal travel.

All U-M employees are eligible to participate in CSTP, which provides saliva testing for asymptomatic individuals. Additional information about CSTP, including how to enroll, can be found at: https://campusblueprint.umich.edu/testing-monitoring/sampling-tracking-program

Information about community testing sites can be found at: https://www.michigan.gov/coronavirus/0,9753,7-406-99891_99912---,00.html

9/27/22
Where are the U-M Health COVID-19 testing locations?

<table>
<thead>
<tr>
<th>U-M Health Drive / Walk Thru Testing Locations</th>
<th>Location Days/Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brighton Center for Specialty Care</td>
<td>Mon &amp; Fri 8am-5pm, Tues &amp; Sat 8am-noon</td>
</tr>
<tr>
<td>7500 Challis Road, Brighton, MI 48116</td>
<td>Wed 1pm-5pm (no Thurs hours)</td>
</tr>
<tr>
<td>KMS</td>
<td>Mon-Wed &amp; Fri 8am-5pm</td>
</tr>
<tr>
<td>3621 S. State St, Ann Arbor, MI 48108</td>
<td>Thurs &amp; Sat 8am-noon</td>
</tr>
</tbody>
</table>

Please note that testing locations and hours are subject to change.

What should I do while I am waiting for my COVID-19 test result?

<table>
<thead>
<tr>
<th>Reason for testing</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Symptoms concerning for COVID-19</td>
<td>Stay at home and do not come to work</td>
</tr>
<tr>
<td>No symptoms, high-risk exposure</td>
<td>Follow post-exposure guidance listed above</td>
</tr>
<tr>
<td>No symptoms, no exposure (including testing done through CSTP)</td>
<td>Continue to work as long as you do not develop symptoms</td>
</tr>
</tbody>
</table>

What should I do if I am ill but do not meet criteria for COVID-19 testing or have a negative test?

If you do not meet criteria for COVID-19 testing or have a negative test, you should follow established general guidance for employees with an illness:

- For fever (temperature more than 100.4F or 38C) and upper respiratory infection (nasal congestion, sore throat, cough), OR laboratory-confirmed influenza, OR influenza-like illness (upper respiratory infection plus chills, headache or myalgia) with or without fever,
  - You must remain off work until fever and other symptoms have resolved for 24 hours without use of medication
- For upper respiratory infection without fever or cough:
  - You may continue to work and should wear a mask at all times
- Workforce members with acute diarrhea should not work in patient care or food handling areas until symptoms resolve

9/27/22
For additional information about work restrictions due to illness, please refer to the UMHS Infection Prevention work restrictions policy.

How can I report outside COVID-19 test results to OHS?

If you undergo COVID-19 testing that is not ordered by OHS, please report positive results using the “Report Positive COVID-19 Test Results” tile on Wolverine Access: https://wolverineaccess.umich.edu/collection/all/covid-19. Negative test results should only be submitted to OHS if they are for a symptomatic employee that needs an email clearing them to return to work.

What types of COVID-19 tests are accepted by OHS?
OHS accepts negative and positive PCR tests from all sample types – nasopharyngeal swab, nasal swab, or saliva. Positive home antigen test results are accepted. Negative home antigen test results are not accepted for symptomatic employees, and follow-up testing with a PCR test is recommended.

How can I prevent transmitting COVID-19 to others?

If you have COVID-19, most importantly you should isolate and use the recommended steps to prevent transmission to others, as suggested in this CDC guidance: https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html

How can I protect others living in my home from exposure to COVID-19?
The CDC recommends the following ways to keep your home clean and safe: https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/index.html

What is the latest travel guidance for U-M workforce members?

U-M workforce members should follow updated CDC guidance for domestic and international travel. There is no requirement to quarantine following domestic or international travel.

What are the recommendations for Michigan Medicine employees who are at increased risk for complications related to COVID-19?

Based on risk assessment by IPE and OHS, employees caring for or entering the rooms of symptomatic patients who are being tested for COVID-19 or patients who have confirmed COVID-19 should not:

- Be pregnant
- Be immunocompromised, including:

9/27/22
Persons with primary or acquired immunodeficiency
- Persons on anti-rejection therapy following solid organ transplant or bone marrow transplant
- Persons on biologic therapeutic agents such as tumor necrosis factor inhibitors
- Persons with malignancy and ongoing or recent chemotherapy
- Persons receiving systemic immunosuppressive therapy, including corticosteroids equivalent to 20 mg/day of prednisone for ≥2 weeks
- Be 70 years of age or older

Employees with the above conditions may continue to provide care for or enter the rooms of patients who are not symptomatic and being tested for COVID-19 or are confirmed to be negative for COVID-19. In addition, fully vaccinated employees with the above conditions may choose to care for patients with COVID-19 following consultation with their healthcare provider.

Employees with a documented health condition other than those listed above can request accommodations. They would need to provide supporting documentation to the HR Solutions Center, which would need to include the reason why the employee is unable to perform the essential functions of their role and what, if any, accommodations are recommended.

For additional information about medical conditions that may increase risk for severe illness due to COVID-19, please refer to: https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/index.html

Contact and Additional Resources

How Do I Contact OHS?

- For workforce members with symptoms concerning for COVID-19, go to the MyUofMHealth patient portal to assess eligibility for testing and schedule a test
- For urgent matters, call (734) 764-8021
  - Available 7 a.m. – 5 p.m. | 7 days a week
- For non-urgent matters, refer to the OHS website or e-mail occupational-health@med.umich.edu
- Contact OHS by phone or e-mail prior to visiting in person
- OHS is located at C380 Med Inn Building; clinic hours of operation are Monday – Friday 7 a.m. - 5 p.m.
