

Taking distributions from your retirement plan

Below are common options for receiving income after you retire. Most people select a combination of income streams in order to meet their needs. It's important to note that not all options are available from all University of Michigan plans and/or from all investment options. The information below is intended to be a summary and not a comprehensive description. Before making any decisions, be sure to meet with a TIAA financial consultant to discuss your situation and the potential income solution(s) available to you. Call **800-842-2252** to speak with a TIAA representative or schedule an appointment.

Note: be sure to establish and maintain accurate banking and address information, and allow sufficient time for TIAA to process changes, in order to avoid payment delays.

¹ Any guarantees under annuities issued by TIAA are subject to TIAA's claims-paying ability. Income from the variable accounts will rise or fall based on the performance of the underlying investments.

² Choosing these options will reduce the amount received once annuitized.

³ There are no fees or charges to initiate or stop this feature. However, it's important to note that your annuity's balance will be reduced by the income payments you receive, independent of the annuity's performance. Income Test Drive income payments are based upon the annuitization of the amount in the account, period (minimum of 10 years), and other factors chosen by the participant. If you do not stop the Income Test Drive within the 2 year test period, the remaining balance in the account you selected for the Income Text Drive Feature will be annuitized in accordance with the selections you made for the Income Test Drive. Annuitization is irrevocable.
