Twist & Shout: No-No

Turn About: ERGO
ERGOnomics makes it easy to be more comfortable at work.

Instead of twisting your torso, move your whole body – especially when lifting. Remember, nose and toes should point the same direction. Give it a try:

1. Place postcard on table; stand with your hip next to the card.
2. Move your feet – keep your nose and toes pointing in the same direction and retrieve card.
3. Enjoy.
